

European tyre label overview

From 1 May 2021, a renewed European tyre label [Provision (EU) 2020/740] will apply to both passenger cars and light and heavy commercial vehicles. This label provides information on the energy efficiency, wet performance and noise levels associated with a particular type of tyre. In addition, winter and all-season tyres are identified by a snowflake symbol.

Below is an overview of all types of tyres supplied by Kraker Trailers. Click on the desired tyre type and you will be linked directly to the relevant tyre label in the European database:

	Type
Bridgestone	Bridgestone 385/65 R22,5 RT2 160K158L 3PMSF
